COLDPROOF EXCURSION REPORT

Fridge ID Domestic/Bar Fridge (Non-Compliant)
Date Range Analysed Not specified

GEYER Classification	GEYER RED
Outcome Status	CRITICAL

Clinical Summary

Fridge Name	Domestic/Bar Fridge (Non-Compliant)
Model	Model not specified
Date Range	Not specified
Total Data Points	156019
Number of Excursions	33
Longest Excursion	2940.8 minutes
Time Above 8°C	7705.4 minutes
Time Below 2°C	0.0 minutes
Classification Rule Triggered	REPORTABLE BREACH

GEYER Classification

GEYER RED
Reason: Critical breach

Pharmacist Review

Summary Interpretation: The refrigerator demonstrated temperature behaviour that may be inconsistent with Strive-for-5 guidelines. A risk-based assessment is indicated.

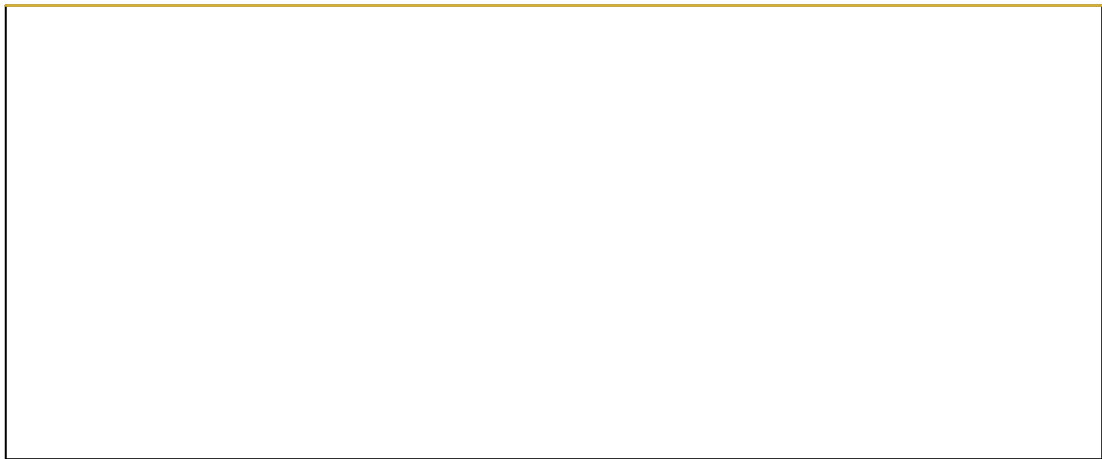

Action:

- Quarantine stock where appropriate.
- Supervisor pharmacist review required.
- Document the outcome in the local clinical governance system.

Fridge Signature

Mean temperature	N/A
Min / max	5.3 °C / 42.2 °C
Drift	N/A
Spike frequency	N/A
Cooling return slope	N/A
Power-cycle detection	N/A
Sensor noise index	N/A

Fridge Signature Trace

Interpretation Notes

- Wide range and/or high variability suggests domestic/non-compliant fridge.

Clinical Interpretation

The recorded excursions indicate periods where product temperatures may have been outside the recommended 2–8°C range. The pattern and duration of excursions should be interpreted in the context of vaccine stability data, storage conditions, and local policy.

Final Recommendation: Review Required

ColdProof recommends that stock stored during the flagged excursions be quarantined and assessed by a supervising pharmacist, with outcomes documented in accordance with Strive-for-5 and local clinical governance.
